REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the claims are allowable over prior of record, because none of references in alone or in combination discloses: a splicer system (or a method) for joining a first optical fiber and a second optical fiber along a common fiber axis by fusion splicing, the system comprising: a user interface; an electric arc welding system; holding means; illumination means; polarized light detection means; rotation means; measuring means; lateral alignment means; an imaging optical system; and electronic control circuitry, as discloses in claims 1 and 11.

The structure of the splicer system and the method for joining two optical fiber is critically, since the device and the method are improved: low attenuation, optimize the lateral and azimuthally alignment of the fiber prior to fusion; minimized the insertion loss and mode cross-coupling of the splice.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
